

Parameters	Unit	Hydraulic separator
Flow rate	m <sup>3</sup> /h	3.0
Heating power	kW ( $\Delta T=20^{\circ}\text{C}$ )	225
Manifold length	mm	6/4" Female
Installation side connection	-	6/4" Male
Boiler side connection	-	1x 1/2" Female
Additional connection	-	125
Installation side spacing	mm	125
Boiler side spacing	mm	6
Maximum pressure	bar	110
Maximum operating temperatures	$^{\circ}\text{C}$	3.0
Manifold insulation	-	20mm-thick EPP

Hydraulic separator is designed for central heating installations of 60 kW. The device is designed to separate the primary circuit from the heating circuit, to eliminate the need to balance the boiler and heating circuits, and to maintain independent streams in the boiler circuit and heating circuits. The separator is placed in insulation made of EPP.
